

# AR Filling / Emptying Head

## General Information:

The AR Filling / Emptying Head provides a safe and easy filling and emptying option for drums, containers and much more. The filling connection is made by thread (gas-tight) or plug system.

The AR Drum Filling / Emptying Head has up to three connections (3 in 1 principle)

1. Product
2. Gas / Vapour
3. Proximity Switch (High Level Cut Off)

To avoid foaming of the media (submerged filling option) the Filling / Emptying Head can be equipped with a dip pipe, which can be adjusted to the height of the container. For highly viscous media we offer an optional heating jacket system

## Technical Data

### Connections

<b>Container:</b>	<b>Male Threads:</b>	G2", S56 x 4, S63 x 5, S70 x 6, S160 x 7
	<b>Flanged:</b>	G2", S56 x 4, S63 x 5, S70 x 6, S160 x 7
		Other threads or flange connections on request
<b>Product Line:</b>	<b>Male Threads:</b>	0.5", 0.75", 1", 1.5", a.o.
	<b>Flanged:</b>	0.5", 0.75", 1", 1.5", a.o.
		Other threads or flange connections on request
<b>Gas / Vapour Line:</b>	<b>Male Threads</b>	0.5", 0.75", 1", 1.5", a.o.
	<b>Flanged</b>	0.5", 0.75", 1", 1.5", a.o.
		Other threads or flange connections on request
<b>Proximity Switch:</b>	<b>Female Threads:</b>	0.375", 0.75", 1", a.o.
	<b>Flanged:</b>	0.375", 0.75", 1", a.o.
		Other threads or flange connections on request
<b>Materials:</b>		1.4571 (316Ti), 1.4404 (316L)
		1.4571 (316Ti), 1.4404 (316L) HALAR coated
		Other materials on request
