

# Articulated Roof Drain

The Articulated Roof Drain is installed inside floating roof storage tanks and has the function to drain the rainwater from the roof of the tank. The roof is designed with a slope converging on the centre where there is a collection point with connection flange for the drainage unit. The drainage unit installed inside the tank follows the vertical movement of the roof.

## Operating Conditions

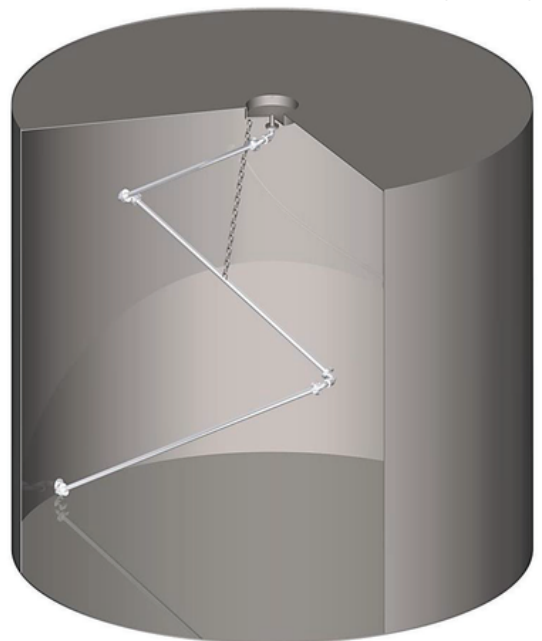

Seal Material VITON®

## Notes:

- (\*\*) "A", "B" and "C" dimensions are calculated according to the tank height

## Demonstration of the Operating Range

Part List		
Pos	Description	Model
1	Style 40 Swivel Joint	2174
2	Flanged Lower Section	
3	Flanged Middle Section	
4	Flanged Upper Section	
5	Support Chain
