Rollover Pallet Gate

Designed for all-round edge protection:

The EWFM Rollover Pallet Gate is our most popular pallet gate model. Durable and easy to operate, the design means the gate only uses half the space of the load in its closed position.

Technical Specification:

All Pallet Gate Units are manufactured and constructed to the highest quality for long lasting durability and many years of maintenance free operation in harsh environments.

The Units are manufactured from mild steel and finished in powder coated yellow to BS 08E51 or galvanised to BS 729. Other finishes are available on request.

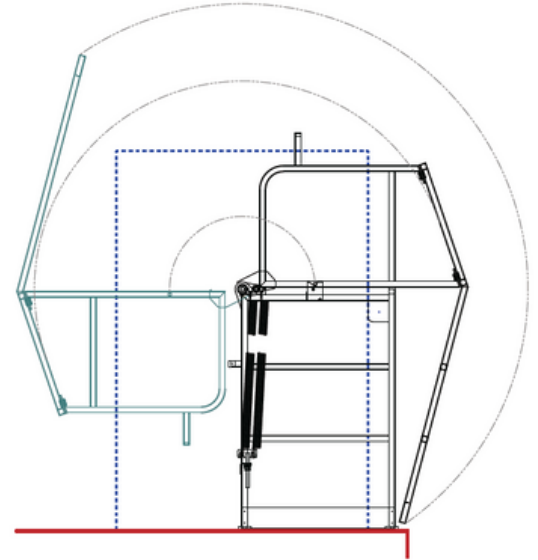

The Pallet Gate Units are spring assisted and manually operated.

Clearance:

A minimum height clearance required for the Pallet Gate Unit to operate is 2530mm.

Installation:

EWFM offer supply only or full installation and commissioning: Supply only units come with full installation instructions. Also we offer on-going staff training and instruction as well as annual inspection and maintenance
